Happenings At COLT

by Region 9 Team

Starting off, we here at the Region 9 officer team would like to discuss the happenings at COLT, or the Chapter Officer Leadership Training, taking place in Marina Park Community Center. In this event, we regional officers discussed with the officers of the many chapters in the region about their responsibilities to their chapter and region. We did this through individual officer workshops, where each of us spit off and discussed with our respective officers, with the President talking with the Presidents, Secretary to the Secretaries, and Historian to the Historians, etc. Later, we worked on team building exercises such as a two person water balloon toss and a group sand castle making contest. After all that, the chapter officers were ready to go through the many stories that unfolded in their chapters, and we Region 9 officers continued ours.

The Meeting At Fall!

by Region 9 Team

Continuing our tale, the Region 9 officer team met many chapters of Region 9 at Alhambra High School, where we introduced new students to FCCLA and informed everyone there about a variety of topics, including our new Region Cheer, announcements involving the State and the Region, and we split off with two state officers from Region 9, Diane Chen and Sophia Htay, into four workshops to teach students about several topics concerning FCCLA

By the end of those workshops, we concluded the meeting with teaching the students the super cool new Region 9 cheer, and found people interested in becoming a regional officer and running in the State Leadership conference in April. We had a surprising amount of interest in this and encourage anyone with the passion to become at least a chapter officer and get into the leadership part of FCCLA, because to be perfectly honest, it is surprisingly fun going through this story once more as a regional officer.

"The Future is bright for all that reach for a better tomorrow."
